

► Our technology. Your success.
Fire Protection

When things get hot:
Fire-Fighting Packages from KSB

There's more to fire protection than flame and fortune

Customers put high demands on fire protection systems: On the one hand, they hope that they will never actually need them. On the other hand, they expect everything to work perfectly if fire does strike.

KSB Services delivers solutions for all types of fire protection systems including sprinkler, foam, gas and water mist, firefighting equipment.

Our Services

Our clients can be confident that our expertise approach to each project with same seriousness and strong relations with our partners will ensure that their projects will be delivered on time and to budget.

■ Engineering

Engineering services include design and hydraulic calculations of gaseous, sprinkler, foam and water based extinguishing systems, the development of fire protection system design drawings and specifications plus product selection. At KSB Services, our engineers are specifically trained and educated to address fire safety issues, project needs and client concerns as they relate to fire protection, firefighting & safety and can be called upon at any point in a project's development.

■ Procurement

Through longstanding global alliances and networks, KSB Services is able to efficiently source anything our clients require - anywhere - from highly trusted sources. Our partnerships allow us to achieve the ideal purchase: targeting value, product quality, and an optimal logistics solution to save time and money.

■ Construction

KSB Services has the capability to construct all types of fire protection, firefighting and safety systems. All construction works are undertaken by team of professionals ensuring reduced project risk, delivered to a high standard of quality, on time and at agreed budget.

When things get hot, we're on hand
